

1

Crop Production and Management

Learning Competencies

By the end of the lesson, the students will be able to

- Identify various crops and the food they provide us.
- Name basic agricultural practices a farmer uses to grow a crop.
- Separate healthy seeds from unhealthy ones.
- Understand benefits of using manure over fertilisers.
- Understand how to follow modern methods of irrigation to save water.
- Know correct ways to store perishable and non-perishable food materials.
- Appreciate the usefulness of animals as a source of food for humans.

Responsible Consumption and Production

Zero Hunger

Overview of the Lesson
