

2

Nutrition in Animals

Learning Competencies

By the end of the lesson, the students will be able to

- Draw a flowchart showing the steps involved in animal nutrition.
- Identify the four types of teeth in their mouth and link their shape to their functions.
- Appreciate the role of tongue in helping mix saliva with food in the mouth and to identify taste.
- Understand the role of various digestive organs in the process of digestion.

Life on Land

Overview of the Lesson
