### Why National Green Corps (NGC) “Eco-club” Programme?

Environmental legislation and its implementation alone cannot address the very complicated environmental issues. It is, therefore, very important to involve the school and college students in large numbers along with general public and Government machineries to improve the complicated environmental status. Hence, the propagation of environmental awareness generation after generation is one of the key elements which will help in implementation of environmental laws and rules in as much better way. Keeping this in mind, National Green Corps programme has been introduced by the Ministry of Environment, Forests & Climate change, Government of India with an aim of spreading awareness about environment among students by involving them in various environment related programmes through the Eco-Clubs constituted in respective schools and colleges. The members of these Eco-Clubs are called National Green Corps. The programme aims at creating awareness among school and college students for environmental conservation and sustainable development across the country. It also aims to sensitize and nurture students on nature conservation leading towards positive environmental actions at different levels.

## Purpose to establish Eco-club

- Teach others about what we have learned
- Actively involve with nature physically and spiritually
- Provide a service to our community

- 

### Aim and Objectives of Eco Club:

Constitution of Eco-Clubs aim at raising a National Green Army in schools and colleges all over the country to spread environmental awareness in society and carry out action based programmes for protection, improvement and sustenance of environment. The main objectives are:

- . To provide environmental education opportunities for students.
- To facilitate students participation in decision making in the areas related to environment and development.
- To involve students in action based programmes related to environment in their surroundings.
- To bring students into direct contact with various environmental issues.

Eco Club plays an important role in creating environmental awareness amongst the future generation. Eco club or green club is a voluntary group which promotes the participation of students in learning about and improving their environment. A green club is a means by which students and youth can organize themselves to learn more about this issue, and also take action to improve their immediate environment.

### Activities under the scheme include
